Text+ objectives

- empower text and language data and access to such data.
- enhance the digital literacy of researchers.
- encompass the diversity of the research community and build on their participation.
- promote inter- and transdisciplinarity as well as innovation – for instance in the field of artificial intelligence – through the integration of infrastructure and research.

This presentation was created in the context of the work of the association German National Research Data Infrastructure (NFDI) e.V. NFDI is financed by the Federal Republic of Germany and the 16 federal states, and the consortium Text+ is funded by the Deutsche Forschungsgemeinschaft (DFG, German Research Foundation) - project number 460033370. The authors would like to thank for the funding and support. Furthermore, thanks also include all institutions and actors who are committed to the association and its goals.
